

Set User roles for system Access

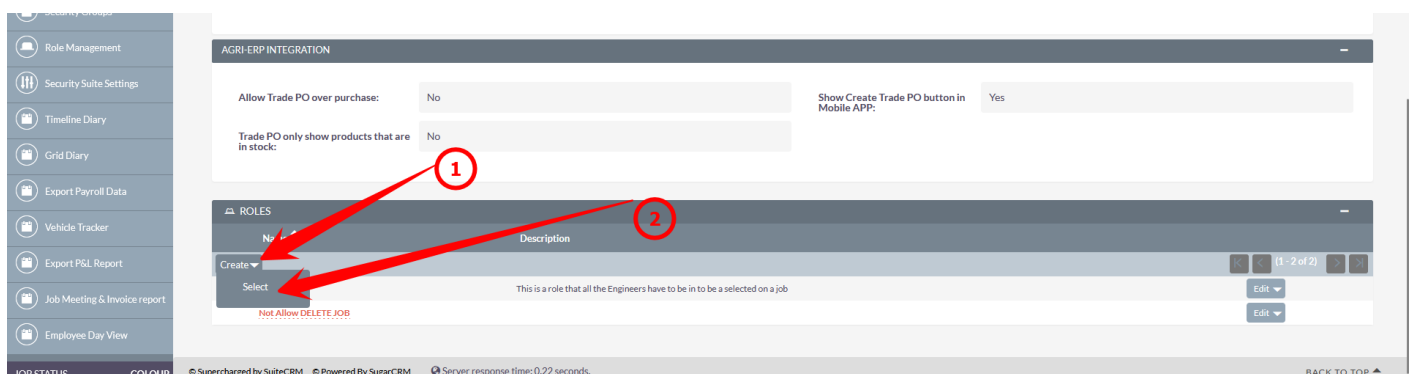

The system has an advanced set of system roles that determine what users can see and do. Users must have roles applied to them to do certain tasks. For example an engineer must have the role "Engineer" assigned to them to be selectable for a location timing to undertake a job.

To set role - from the user screen here:

Scroll down to the roles panel > select the Arrow (DO NOT click Create).

1. Select the down arrow
2. Click the select option

Select the appropriate role for the user.

Demo Services Company — Mozilla Firefox Private Browsing

SEARCH CLEAR

Roles

| Name | Description |
|------------------------------------|--|
| (1 - 11 of 11) | |
| BristolWaterAdminOOH | |
| Sears Engineer | If the users is in this role they will see the SEARS section within the Universal Jobsheet |
| External Contractor | This role can only create jobs and then edit those jobs and complete those worksheets for those jobs.... |
| Can update Job Status to Completed | Only users in this role can set a JOB status to Completed. |
| Can Update WIP JOB Status | |
| Not Allow DELETE JOB | |
| Contractors | |
| Surveyors | List of Company Surveyors |
| Engineers | This is a role that all the Engineers have to be in to be a selected on a job |
| (1 - 11 of 11) | |

Logout of the system for that user and log back in to apply the role changes.
