# Create a Product Range

1. Click the "+" icon next to the Flooring Type where you want to create the new Product Range

2. Type the name of Product Range, set the default supplier and add the quote script.

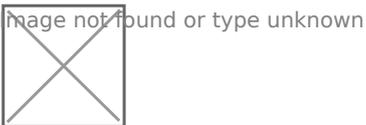

3. Select the options required for the Product Range.

Tip: Tip! The options required for the Product Range are automatically shown based on the parent Flooring Type of the Product Range. If you are not seeing the fields you are expecting it is likely that the Parent Flooring Type type is set incorrectly.

4. Click "SUBMIT" to save the Product Range
